Erasure-Coded File Transfer
Computer Networks Mini Project

The file is split into k blocks, encoded over GF(256),
sent over UDP and rebuilt from any k independent packets.

Packet 1: a random mix of every block.
Packet 2: a random mix of every block.
Packet 3: a random mix of every block.
Packet 4: a random mix of every block.
Packet 5: a random mix of every block.
Packet 6: a random mix of every block.
Packet 7: a random mix of every block.
Packet 8: a random mix of every block.
Packet 9: a random mix of every block.
Packet 10: a random mix of every block.
Packet 11: a random mix of every block.
Packet 12: a random mix of every block.
Packet 13: a random mix of every block.
Packet 14: a random mix of every block.
Packet 15: a random mix of every block.
Packet 16: a random mix of every block.
Packet 17: a random mix of every block.
Packet 18: a random mix of every block.
Packet 19: a random mix of every block.
Packet 20: a random mix of every block.
Packet 21: a random mix of every block.
Packet 22: a random mix of every block.
Packet 23: a random mix of every block.
Packet 24: a random mix of every block.
Packet 25: a random mix of every block.
Packet 26: a random mix of every block.
Packet 27: a random mix of every block.
Packet 28: a random mix of every block.
Packet 29: a random mix of every block.
Packet 30: a random mix of every block.
Packet 31: a random mix of every block.
Packet 32: a random mix of every block.
Packet 33: a random mix of every block.
Packet 34: a random mix of every block.
Packet 35: a random mix of every block.
Packet 36: a random mix of every block.
Packet 37: a random mix of every block.
Packet 38: a random mix of every block.
Packet 39: a random mix of every block.
Packet 40: a random mix of every block.
Packet 41: a random mix of every block.
Packet 42: a random mix of every block.
Packet 43: a random mix of every block.
Packet 44: a random mix of every block.
Packet 45: a random mix of every block.
Packet 46: a random mix of every block.
Packet 47: a random mix of every block.
Packet 48: a random mix of every block.
Packet 49: a random mix of every block.
Packet 50: a random mix of every block.
Packet 51: a random mix of every block.
Packet 52: a random mix of every block.
Packet 53: a random mix of every block.
Packet 54: a random mix of every block.
Packet 55: a random mix of every block.
Packet 56: a random mix of every block.
Packet 57: a random mix of every block.
Packet 58: a random mix of every block.
